## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 12/27/2006 have been fully considered but they are not persuasive. Claim 5 has been modified to state that it is a method of performing a route lookup. However a positive step of looking up and using the found route was not added to the claims. Despite the use of the word "configuring" the claim still does not perform a task.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 5-8, 14, and 17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. There is no practical application. Claim 5 never uses the found route to send the packet anywhere. Claim 14 simply updates a database. The database is not used to produce a useful and tangible result.
